

“Everyone at Roosevelt Collection has been pleased with the Park Assist installation and the resulting solution. The project was delivered on time and on budget, prior to our grand opening, with a resoundingly positive reception from our customers.”

Joshua Rosenberg, CPM, ACoM
Assistant General Manager
THE ROOSEVELT COLLECTION

Located in the heart of Chicago’s sophisticated South Loop, Roosevelt Collection is an open air, mixed-use development for the 21st Century. The center is home to premium national and local retailers, 342 Class-A luxury lofts and a vibrant central park.

“We selected Park Assist because it gave us the best possible solution to improve the customer experience and to achieve operational efficiencies. Our objectives were overwhelmingly realized.”

To further expand its operational effectiveness, The Roosevelt Collection is also rolling out our **Park Surveillance™** functionality across its three-level 1,500-space parking facility. This powerful API uses the unique vantage point of our smart-sensor cameras to detect motion and capture streaming video, in and around the parking bays themselves. Helping McCaffery Interests to improve monitoring and security. While providing customers with additional peace-of-mind.

“Park Assist has provided us with exceptional results, from planning through installation and continuing support. We highly recommend their services, and will use Park Assist again in the future.”
